Veraciq

Objective. Precise. Actionable.

PROJECT HEALTH & DIAGNOSTIC ASSESSMENT

Trevor: +27 81 425 0683 | Bruce: +27 83 445 0327 | trevor@agile-revive.com | agile-revive.com

When a project begins to show signs of trouble, the first question is always the same: how bad is it, really? Opinions differ. Politics interfere. The PM is defensive. The sponsor is anxious. Veraciq cuts through the noise — a structured, document-driven diagnostic that evaluates your project's artefact completeness, identifies gaps by severity, maps risk and issue areas, and produces an objective success likelihood score. Evidence first. Judgement second.

6 assessment domains	Severity-ranked gaps	Success likelihood score	Actionable output
Full lifecycle coverage	Critical / High / Medium	Objective percentage rating	Owner-assigned next steps

WHAT A VERACIQ ASSESSMENT PRODUCES

Document status map

Every project artefact evaluated individually — Present, Draft, Partial, Conflicting, or Missing — with specific findings per document.

Success likelihood score

A single, evidence-based percentage rating of delivery confidence derived from documentation completeness across the full project lifecycle.

Gap analysis by severity

All identified gaps ranked Critical, High, or Medium — each with source reference, detailed explanation, and a specific assigned action.

Risk register output

Existing risks confirmed and evaluated. New risks identified from documentation gaps automatically surfaced with mitigation guidance.

RTM traceability updates

Requirements Traceability Matrix gaps identified and updated — ensuring requirements are covered from specification through to testing.

Phase readiness timeline

A phase-by-phase view of project readiness from Requirements through to Deployment, with prioritised immediate actions per phase.

THREE WAYS ORGANISATIONS USE VERACIQ

01 Project in trouble

When a project has gone RED or is showing early warning signs — Veraciq provides the objective diagnostic that removes politics from the conversation and tells you exactly where the problems lie.

02 Pre-employment PM assessment

Before appointing a PM, use Veraciq to assess their understanding of documentation requirements, lifecycle coverage and risk awareness. Hire on evidence, not interview performance.

03 PMO best practice review

Run your organisation's standard project framework through Veraciq to identify systemic gaps in methodology — and benchmark against best practice before a project begins.

HOW VERACIQ CONNECTS TO YOUR AGILE REVIVE ENGAGEMENT

Veraciq is the diagnostic engine behind Rectifiq. When a project enters our rescue programme, Veraciq runs first — producing the objective evidence base that removes subjectivity from the recovery conversation. It can also be commissioned as a standalone assessment, entirely independent of any other Agile Revive service.
